

PROBLEMS WE ADDRESS

- Environmental pollution, including microplastics
- Energy crisis and inefficient solutions
- High dropout rates in competitive research
- Lack of practical training platforms in education

OUR SOLUTIONS

- Clean Water & Green Energy: Cost-effective systems for purification and energy.
- Research Assistance: Third-party support for industrial and academic projects.
- Tailored Workshops: Hands-on training with analytical instruments and data analysis.

We are at . .

SDF - 1st Floor

Advanced Technology Park - KINFRA

Ramanattukara, Kerala - 673633

QUIMI

Scientific Solutions LLP

A promise to the future

Who we are. .

Quimi Scientific Solutions is a women-led startup dedicated to developing eco-friendly, sustainable technologies by merging plant-based materials with advanced nanotechnology. Beyond research, we offer customized analytical services and training programs, nurturing the next generation of scientists.

MISSION & VISION

- Mission: To develop and deliver sustainable solutions, drive scientific advancements, and foster future researchers.
- Vision: To be a global leader in sustainable technology, integrating plant derivatives and nanoparticles to create solutions that reduce environmental impact and improve lives.
